Dear Linda and Marvin,

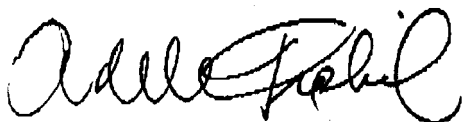

This letter is an acknowledgment of the positive results I have had using Pulsor products. I have been practicing interior design and feng shui for over 10 years and using Pulsor products for about 8 years. Because of my concern for the “*energetic balance*” of all projects I work on, I have been researching electromagnetic correction devices for many years. Pulsor products have proven more effective than other devices I have tested. They are now an invaluable adjunct to the more traditional feng shui corrections I use in my business.

Some of the applications I have used Pulsor products for are:

- 1) Supporting health and emotional well-being (*EMR/geopathic stress protection*)
- 2) Increasing productivity
- 3) Reducing conflict
- 4) Restructuring chaos patterns to improve organization and efficiency

I use Pulsor testing in my feng shui audits. The additional energy clearing, balancing and conditioning provided by Pulsors have been noticed and appreciated by many of my clients.

I recommend the product line and training to anyone interested in improving the quality of their home or office environments.
