

May 4, 2001

Dear Linda and Marvin,

It is a pleasure to share this testimonial about how I utilize the Pulsor products.

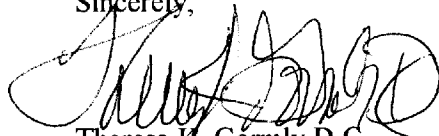

I have been using the Pulsors for over ten years. First, I feel personally protected from getting out of balance when I work on my chiropractic patients. I balance myself every morning and use the Vortex Energy Filters throughout my office. The VEFs help the office staff stay more centered and calm though they are surrounded by all the latest office equipment (computers, fax machines, printer, copier, phone system). I regularly use the Pulsor vests with my patients as it enhances all the other work we do. My patients have even come to ask for it and feel their treatment is complete after using it.

I think Pulsor tools are essential for most people today. Unlike similar tools, Pulsor always tests as beneficial for my patients. Through testing I have found that at least 25% of them are in some way suffering from electro-magnetic related problems. For problems which are EM related or physically, emotionally, and neurologically based, Pulsor balances everything more quickly and effectively than most other modalities will.

On a personal note, I once had to use my Pulsors while on a plane trip. I suffered from an attack of vertigo, which was very frightening. I balanced myself with Pulsor while on the plane and the vertigo stopped. I especially recommend Pulsor for clients who are around a lot of computer equipment or who fly – people who are subjected to general stress due to equipment exposure, etc. For people living in a metropolitan Area such as Los Angeles, this is virtually everyone.

Chemically, structurally, emotionally, everything will change for the better with Pulsor. My patients and I feel better using the Pulsor tools.

Sincerely,

Theresa K. Gormly D.C.
