Los Angeles, CA 90035

Dear Linda and Marvin:

I am extremely satisfied with the results I have experienced using the Pulsor products. After researching options for mitigating the harmful effects of electromagnetic fields and eliminating geo-pathic stress for nearly a year, I realized the Pulsor technology could do both. After placing Pulsor products in the home and office there has been a palpable change to the whole environment. The interference and disturbances that these geo pathologies have caused has been altered significantly!

There are many companies with products that make these claims, but I have tested the Pulsor technology and have a high level of confidence that the Pulsors do not interfere with the human energy field while doing their job. I know that many of the other products do interfere. The truth is that a home or business may have strong Feng Shui but, if the surrounding land or the electromagnetic fields is disruptive, the effectiveness of the Feng Shui is limited and the environment remains unhealthy. Finally, I want to express my appreciation to the both of you for your help and expertise in this area and taking such a personal interest in providing solutions for my own home. I am looking forward to my association with Pulsor in the future.

Sincerely,

MaryAnn Russell  
Consultant
